ABOUT ME

I am Information Technology undergraduate with a strong interest in software quality assurance and test automation. Passionate about learning modern testing tools such as Playwright, testcafe and applying them to real-world scenarios through hands-on projects. Possesses a solid understanding of manual testing concepts, test case design, and data-driven testing using Excel. Highly motivated, detail-oriented, and eager to gain industry exposure through an QA internship.

EDUCATION

2023 - Present

Sri Lanka Institute of
Information Technology,

BSc (Hons) in Information Technology Specializing in Information Technology

3rd year undergraduate student

E-Certificate (University
of Moratuwa Open
Learning)

Introduction to Software Quality Assurance

Covered QA fundamentals, software testing life cycle (STLC), test planning, defect reporting, and quality assurance best practices.

2018 - 2020

Ibbagamuwa central
college

Physical Science Stream (Advance Level Examination) - 2020

Physics C
Combined Maths S
Chemistry S

SKILLS

• Programming languages

Java, JavaScript, Python, Kotlin, PHP, C++, SQL

• Web Technologies

Mern Stack, HTML, CSS, Tailwind CSS, Material UI

• UI/UX

Figma, Canva

• Mobile Development

Android Studio(Kotlin)

• Tools and platforms & APIs

VS code, IntelliJ, Eclipse, Postman API

• Testing tools

Playwright, Testcafe

• Data Analysis & Visualization

Pandas, R - Language, Power BI, Jupiter notebook

• Database Management

MongoDB, MySQL

• Version Control & DevOps tools

Git, Github

• Frameworks & Libraries

React, Node.js, Express

- Excellent attention, Analytical Thinking, Time management, Attention to Detail, team collaboration, problem solving, Critical thinking, Good communication skills, Willingness to Learn.

PROJECTS

- **Test Automation Assignment – Playwright**

Academic Project - 2026

Automated manual test cases for a web-based test translator application using modern QA practices.

Technologies - Playwright, JavaScript, Excel, Visual Studio Code

Role -QA Automation Engineer

- Automated functional test cases using Playwright.
- Applied Excel-driven data testing for multiple input validations.
- Verified UI behavior and translation outputs with assertions.

- **Pawfect care - pet care management system**

Academic Project - 2025

A full-stack MERN application for a managing pet and veterinary records with smart features.

Technologies - React.js, Node.js, Express.js, Mongo DB

Role - Full Stack Developer & project group leader

- Led a team in developing a full-stack MERN application for managing pet, veterinary, and treatment records.
- Designed and implemented responsive UI components using React.js.
- Developed RESTful APIs using Node.js and Express.js with MongoDB for secure data handling.
- Implemented advanced search and filtering to improve data retrieval efficiency.
- Coordinated development tasks, code integration, and project documentation.

- **Usability Testing & UX Evaluation of Craigslist**

Role - UI/UX Designer & Usability Analyst

Technologies - Figma (UI/UX Design & Prototyping)

- Conducted usability evaluation on Craigslist focusing on login, post-ad, and product view pages.
- Designed task-based usability test cases for different user roles.
- Evaluated user interactions using efficiency, effectiveness, and satisfaction metrics.
- Identified usability issues, assigned severity levels, and proposed UI/UX improvements based on HCI principles.

- **Banking Information Security Risk Assessment**

Role - Security Analyst

Technologies - OCTAVE Allegro Framework

- Conducted a banking-sector security risk assessment focusing on ATM transaction systems.
- Analyzed real-world threats including ATM jackpotting, malware injection, physical tampering, and network failures.
- Assessed business impacts such as financial loss, service downtime, and regulatory risks.
- Recommended mitigation strategies including OS hardening, tamper detection, DDoS protection, and redundancy planning.
